

Fire Side Conversations

Opportunities for Business and Investment

The Ugandan market presents unique opportunities for e-mobility businesses and investors. The discussion will highlight the potential growth areas, challenges, and strategies for successful investment in the sector.

Arthur Mukembo

Future Lab Studio Lead Innovation Village

E-Mobility Policy Interventions

Uganda is at the nascent stage of adopting e-mobility policies. The discussion will focus on best practices, potential challenges, and opportunities for creating a supportive regulatory environment for e-mobility in the country.

Energy and Infrastructure for E-Mobility

Adequate energy infrastructure is crucial for the successful adoption of e-mobility. The discussion will address challenges related to charging infrastructure, grid integration, energy storage solutions and maintenance for electric vehicles in Uganda.

Eng. Samuel Kizito

Manager Planning and Investments - Electricity Regulatory Authority

Carbon Trading in the E-Mobility Context

E-mobility can play a significant role in reducing carbon emissions. The discussion will explore the potential of carbon trading mechanisms to incentivize e-mobility adoption.
